Please read these instructions carefully before assembling

**dnp LaserPanel™ Touch**

Installation guide

**dnp optical flat screen**

**Attention!**
- Ensure good wall flatness for optimal result. An uneven wall can lead to screen bowing and geometry distortions.
- Follow all assembly instructions. Incorrect assembly can lead to screen damage and invalidate the dnp warranty.
- Use suitable materials and methods for the wall in question. dnp Denmark is not responsible for improper mounting.
- Optional! The included rawlplugs are for concrete- or brick wall installation only.
- Be two persons to install screen.
- Keep sharp objects away from the screen as they can scratch the surface and thereby damage the optical properties.
- Be careful of sharp corner edges when screen is installed. Keep away from children.
