

Sharp images for even sharper minds

Immersive, interactive learning – that’s the goal of the Interactive Learning Centre at ACS International School I Cobham, UK. When the school replaced a disappointing screen with a dnp Supernova Infinity Screen, the result was a step-change improvement in the learning experience. Good enough to be named as our Installation of the Month.

High quality expectations

ACS International School in Cobham, UK, has an advanced Interactive Learning Centre (iLC). The school was concerned that the iLC’s existing projector screen was proving a disappointment, and decided to upgrade to help maintain its leading position in its market.

Clarity and contrast for every seat

The 140-seat iLC presented a number of challenges for installer AvexiA. First, the screen has to deliver clear images to every seat, whatever the viewing angle and distance. Second, the iLC has very bright ambient lighting. Finally, the iLC is also used for HD videoconferencing, and it is important that participants do not look washed-out on screen.

Cost-effective quality

For ACS, the dnp Supernova Infinity Screen’s image quality and cost-effectiveness were the deciding factors against other options. Thanks to its ISF-certified 08-85 screen material, the Supernova Screen offers high contrast and razor-sharp detail even in the brightly lit iLC.

Now an immersive and interactive experience

The school is delighted with its wall-mounted dnp Supernova Infinity solution. As a leader in its field, ACS International School is judged on the quality of the education it provides. The school’s iLC now offers a step-change improvement, giving students an impressively immersive and interactive learning experience.
