dnp Supernova Infinity screen in People's Court

People's Court in Hefei, the capital of China's Anhui Province, has upgraded the AV solution in its main meeting room with a 150" dnp Supernova Infinity Screen. The AV experts from Wincomn are the architects of this month's featured installation.

The Party Leadership Group meeting room in Hefei People's Court is a place where many important decisions are made. Therefore the presentation equipment must be top notch in terms of performance and reliability.

After years of use, the old installation no longer met the requirements for a modern presentation solution. The management wanted a display that could deliver high image quality without having to use blackout curtains in the bright meeting room. So they turned to Wincomn for advice.

A winning projector-screen combination

"The meeting room was very bright. At the same time, the layout of the room required a screen with wide viewing angles, so that people seated in the side of the room can enjoy the best possible image quality", said the chief project manager from Wincomn.

To overcome the challenges of high ambient light and a wide seating arrangement, Wincomn chose a dnp Supernova Screen powered by a Christie projector – a winning combination for this type of projection environment.

Modular display system

The dnp Supernova Infinity is a modular screen system that creates exceptionally large-sized viewing experiences out of any number of Supernova screen units. The screen can be curved, angled or tilted, and it can be installed on the wall, from the ceiling or raised on a floor-stand.

The Supernova Infinity in Hefei People's Court is installed on the back wall in an auditorium configuration with ISF-certified Supernova 08-85 screen material A screen material characterized by offering true deep black levels, high contrast and extreme viewing angles.

Enhanced viewing experience

"The new installation offers a dramatically enhanced viewing experience. It provides exactly the performance requested by Hefei People's Court, so we have a very happy client", said the chief project manager from Wincomn.
